Engine: 2,5 Ltr. mit 100 KW (136 PS)

6 Gear manual transmission

Ausstattung:

Body: Standard roof, right-hand sliding door, rear wing doors, partition wall, exhaust concept, EURO5 >3.5 DPF

Ablageschale über Windschutzscheibe

Airbag Driver

Double passenger bench seat

Electronic Stabilization Program (ESP)

Cab doors with power windows

Standard suspension

All-season tires

Climatic air conditioning with semi-automatic control

Fahrzeug Isolation :

The entire interior is wet-laminated, creating a seamless, waterproof, white surface. The floor is tinted in a highly durable blue shade. A professional anti-slip coating in accordance with DIN and slip resistance class KR 13 is standard. The non-slip floor design enables optimal hygiene and easy cleaning. All materials used are, of course, CFC-free and comply with the requirements of the Food Hygiene Ordinance. The insulated floor assembly is reliably protected by stainless steel brackets at the door openings.

Vehicle refrigeration system:

VEHICLE REFRIGERATING SYSTEM CARRIER XARIOS 200 14/240 Volt

The XARIOS 200 is a direct-drive refrigeration unit for transporting chilled and frozen products in light commercial vehicles with a load volume of up to 27 m³. Its distinctive feature is the new profile design with an extra-flat evaporator for a maximum loading height of up to 180 mm below the ceiling. The XARIOS 200 refrigeration unit offers unparalleled performance and reliability in urban traffic.

ONLY FOR SALE OUTSIDE THE EU !!!
