Description:

RENAULT MASTER – Master E-Tech 100% Electric 3.5 t, L2 H2 Battery 87kwh 105 KW / 140 HP

- Driver comfort package
- Driver's seat adjustable in 6 directions with adjustable armrest and lumbar support
- Open R-Link with 10-inch display
- Reversing camera
- Rear doors with 270° opening angle, without windows
- All-season tyres
- Closed storage compartments in the dashboard
- Wireless smartphone charging
- Additional key (fixed 3-button key)
- Bodybuilder interface
- Trailer hitch preparation
- High beam assist
- Delivery package
- Delivery and transfer costs from manufacturer's factory

contourcool is our specially developed roof design for the integration of refrigeration units in refrigerated vehicles.

The distinctive roof shape of **contourcool** creates an elegant, aerodynamic contour that blends seamlessly with the vehicle's body line.

This design reduces air resistance, lowers the overall vehicle height, and gives the vehicle a noticeably more premium and dynamic appearance.

It doesn't just look better – it also drives more efficiently.

novotruck – Vehicle insulation with PBX Ecos M24EVO transport refrigeration system

All vehicle insulation systems are manufactured using a high-density, high-strength insulation material with a **20% recycled content**, produced on a **fully automated production line** to ensure consistently reproducible quality.

What is truly remarkable is that **every vehicle is certified to at least ATP Class A**, with **ATP Class C available as an option**.
