novotruck - Vehicle insulation with CARRIER Citimax - 400 refrigeration system.

We manufacture all vehicle insulation with high-density, high-strength insulation, using 20% recycled material, on a fully automated line with consistently reproducible quality. What's incredible is that every vehicle has at least an ATP-A certification and is also available as an ATP-C certification as an option.

Advantages of the CARRIER - Citimax - 400 refrigeration system

Versatility: For all applications, from fresh to frozen goods

Temperature accuracy: Carrier's expertise with temperature control software

Even greater performance and safety for pure road use. A selection of models tailored to the ambient temperature: standard, high ambient, and low ambient.

Improved structural design for easy hose connection.
